SUMMARY

Full Stack Web Developer with 2.5+ years of experience building and maintaining dynamic web applications and enterprise product data platforms. Currently working at Webkul as an Associate Software Engineer, developing and customizing modules for PIM systems such as Akeneo and UnoPIM based on client requirements.

Experienced in feature development, debugging complex issues, and contributing across the development lifecycle from development to testing and deployment, with a strong focus on scalable solutions and clean code practices. I also leverage AI-powered tools to improve productivity, accelerate debugging, and streamline development workflows.
